Bryan Hankins

Summary

Passionate and skilled AI Developer with a strong foundation in TensorFlow, Natural Language Processing (NLP), and machine learning. I am seeking to leverage my experience in model training, deployment, and data integration to contribute to innovative AI solutions at Solutyics. With a focus on continuous learning and a drive to solve complex challenges, I am eager to advance my career in AI development through this exciting opportunity.

SKILLS

AI & Machine Learning: TensorFlow (proficient), PyTorch, Keras, NLP, unsupervised learning, deep learning, model deployment

Data Management: SQL (proficient), linked data, Talend (familiar), data extraction and manipulation, data integration

Programming Languages: Python, Go, Bash

Cloud Technologies: AWS (EC2, S3, Lambda, RDS), Kubernetes, Docker

DevOps Tools: Jenkins, Git, Terraform

Soft Skills: Problem-solving, team collaboration, continuous learning, innovative thinking

EXPERIENCE
The Celestial Code, Remote — *Full Stack Developer*

5/2024 – current

- Developed and implemented machine learning models using TensorFlow, improving model accuracy by 20% through hyperparameter tuning and data preprocessing.
- Collaborated with cross-functional teams to integrate linked data sources into AI applications, enhancing data connectivity and efficiency.
- Utilized unsupervised learning techniques for data clustering and anomaly detection, contributing to data-driven decision-making.
- Applied NLP techniques for text classification and sentiment analysis in various projects.

Media Mix, Remote — *Full Stack Developer*

5/2023 – 12/2023

- Managed and manipulated large datasets using SQL and Python, contributing to machine learning model development.
- Integrated linked data into applications, optimizing data flows and ensuring smooth operation of AI-driven solutions.

- Collaborated with AI teams to implement AI solutions that aligned with business objectives, achieving a 15% increase in project efficiency.

GeoTech Solutions , Newburgh, IN — *Web Developer*

5/2022 – 5/2023

- Assisted in the development of machine learning models using TensorFlow, focusing on data preprocessing and model evaluation.
- Worked closely with senior developers to optimize machine learning pipelines, improving processing speed by 25%.
- Utilized SQL for data extraction and manipulation, supporting the team in various AI projects.

Bryan Hankins Web Services, Evansville IN — *Manager*

Dec 2020 – Apr 2022

- Managed all aspects of web development projects, from initial consultation to final delivery, ensuring client satisfaction and project success.
- Built strong relationships with clients, providing ongoing support and
- updates to meet evolving business needs.
- Introduced AI tools to streamline development processes, increasing efficiency and reducing turnaround times.

EDUCATION

- Charter University   2024
  Bachelor of Applied Science – Computer Science
- Ivy Tech Community College, Evansville, IN   2020
  Certification of Web Foundations
